

## Agenda Report for Decision

**Meeting Date: 5 December 2024**

Item Name	Establishment of Joint Building Fire Safety Committee	
Presenters	Joel Grieger and Nick Buick	
Purpose of Report	Decision	
Item Number	5.2	
Strategic Plan Reference	4 Discharging Statutory Obligations	
Work Plan Reference	4.3. Ensure the Commission operates in line with governance best practice	
Confidentiality	Not Confidential (Release Immediately)	
Related Decisions		
Conflicts Declared		
Is the Report author aware of any potential undeclared conflict?		NO

### Recommendation

It is recommended that the State Planning Commission (Commission) resolves to:

1. Approve the designation of this item as Not Confidential (Release Immediately).
2. Note the letter dated 26 August 2024 received from Geoff Sheridan of the District Council of Coober Pedy (CP Council) (**Appendix A**).
3. Dissolve the existing Building Fire Safety Committee for Out of Council areas (OOC-BFSC).
4. Simultaneously replace the function of the OOC-BFSC by establishing a Joint Building Fire Safety Committee (Joint BFSC) between CP Council and the Commission, to be responsible for the combined areas of the CP Council and the Out of Council areas.
5. In the Commission's capacity as council for the Out of Council areas, designate the Joint BFSC as an appropriate authority pursuant to the *Planning, Development and Infrastructure Act 2016 (PDI Act)* s 157(16).
6. Approve the revised Terms of Reference and Operating Procedures (TOR) for the Joint BFSC (**Attachment 1**).
7. Appoint the following members (the immediate past-members of the OOC-BFSC) to the Joint BFSC as required under section 157(17) of the Act, for a term of three years commencing on **5 December 2024** and expiring on **4 December 2027**:
  - a) Jodie Evans (Chair);
  - b) Emma Bradley (Senior Building Officer);

- c) Mark Brown (Outback Communities Expert); and
  - d) Colin Paton (CFS Fire Safety Officer).
8. Note the Department will continue to work with the CP Council to finalise the draft Memorandum of Understanding (MOU) (**Attachment 2**).
  9. Authorise the Ex Officio of the Commission to finalise and execute the MOU (**Attachment 2**) once finalised.
  10. Authorise the Commission Chair to sign and send the following letters to:
    - a) the Chief Officer of the Country Fire Service (CFS), as the relevant fire authority for Out-of-Council areas, confirming the continued participation of Mr Colin Paton as a member of the newly established Joint BFSC (**Attachment 3**);
    - b) CP Council, confirming the establishment of the Joint BFSC, the Commission's designation of it as an appropriate authority, the appointment of the members, and the requirements of CP Council to do the same (**Attachment 4**); and
    - c) each appointed member of the Joint BFSC to inform them of the changes contained herein, confirming their continued appointment to the new Joint BFSC, and confirming their agreement with the terms and conditions of appointment (**Attachment 5**).
  11. Authorise the Chair of the Commission to make any minor amendments to **Attachments 1, 3, 4 and 5** as required to finalise.

## Background

The OOC-BFSC is a committee established by the Commission as an 'appropriate authority' for the purposes of compliance with *PDI Act* s 157 in respect of Fire Safety in Out of Council areas in South Australia. It is responsible for reviewing and monitoring building fire safety, ensuring the maintenance of appropriate levels of safety by building owners for the protection of occupiers and users.

By virtue of the *Planning, Development and Infrastructure (General) Regulations 2017 (PDI(Gen) Regs)* r 92, the Commission is included within the definition of "council" for Out of Council areas within South Australia, for the purpose of *PDI Act* Part 11 ss 145—159 (relating to building activity and use).

## Discussion

The Department has received a request from CP Council to establish a joint committee to exercise these building fire safety functions simultaneously across the District Council of Coober Pedy and the Out of Council areas (**Appendix A**). The establishment of an appropriate authority by two (or more) councils is provided for in *PDI Act* s 157(16).

The Department recommends that the Commission agrees to this request, dissolves the existing OOC-BFSC and establishes the Joint BFSC in its place.

## Terms of Reference

The Department has revised the TOR documentation to reflect these changes (**Attachment 1**). The changes made to the existing TOR have been minimal, as needed to reflect the change to a joint committee structure. It is to be read in conjunction with an MOU (that will be finalised by the Department and CP Council) to understand the requirements of the Joint BFSC.

### Membership

It is proposed that the existing committee membership of the OOC-BFSC continues as the membership of the new Joint BFSC, on the same basis for which each member was initially appointed (at **Attachment 3** and **Attachment 4**). CP Council have confirmed that they do not require their own representative to sit on the Joint BFSC, but rather will attend meetings as observers.

### Resources

The draft MOU (at **Attachment 2**) details the agreed contributions from both the CP Council and the Commission to enable the operation of the Joint BFSC in carrying out their required functions. Given the Council still need to designate the Joint BFSC as an appropriate authority, the Department will continue to work with the CP Council to finalise the terms of the MOU. Given the technical nature of the MOU and given resourcing is largely a matter for the Department, it is recommended that the Commission authorise the Ex Officio to sign the MOU on behalf of the Commission. A letter to the District Council of Coober Pedy is provided at **Attachment 5**.

### **Attachments:**

1. Revised Terms of Reference and Operating Procedures for the Joint BFSC (#22468240)
2. Draft Memorandum of Understanding between the Commission & the District Council of Coober Pedy (#22477925)
3. Letter to the Chief Officer of the Country Fire Service (CFS) (#22478283)
4. Letter to appointed Members of the Joint Building Fire Safety Committee (#22478329)
5. Letter to the District Council of Coober Pedy (#22477944)

### **Appendices:**

- A. Letter dated 26 August 2024 from Geoff Sheridan of the District Council of Coober Pedy (#22478829)

Prepared by: Joel Grieger

## 1. Role and purpose

The joint Building Fire Safety Committee (BFSC) for the District Council of Coober Pedy and the Out of Council Areas (Combined Areas) is a joint committee established by the State Planning Commission (SPC) and the District Council of Coober Pedy (Council) as an 'appropriate authority' for the purposes of section 157 of the *Planning, Development and Infrastructure Act 2016 (PDI Act)* (**Appendix A**).

The BFSC is established to inspect existing buildings to enter and inspect any building for the purpose of determining whether the fire safety of a building is adequate.

The PlanSA Guide in relation to Council Building Fire Safety Committees has been utilised in the preparation of the BFSC procedures and protocols (**Appendix B**).

As an 'appropriate authority', when the BFSC finds that the fire safety of a building is not adequate, the BFSC can either require the building owner to take measures to make the fire safety adequate, or it can prohibit occupation or use of the building until an identified fire hazard no longer exists.

The role of the SPC and Council is to:

- establish the BFSC as the appropriate authority for monitoring fire safety in buildings in the Combined Areas;
- appoint persons who meet the membership criteria specified in section 157(17) of the *PDI Act* as members of the BFSC; and
- endorse any policies and procedures proposed by the BFSC for managing fire safety in buildings in the Combined Areas (as applicable to their respective jurisdiction).

## 2. Membership

Persons appointed as members of an 'appropriate authority' must meet the membership criteria specified in section 157(17) of the *PDI Act*.

The appropriate authority will be constituted of—

- (i) a person who holds prescribed qualifications in building surveying appointed by the SPC and Council; and
- (ii) an authorised officer under Part 3 Division 5 or section 86 of the *Fire and Emergency Services Act 2005* who has been approved by the Chief Officer of the Country Fire Service (CFS) to participate as a member of the appropriate authority; and
- (iii) a person with expertise in the area of fire safety appointed by the SPC and Council; and
- (iv) if so determined by the SPC and Council — another person selected by the SPC and Council.

Regulation 113 of the *Planning, Development and Infrastructure (General) Regulations 2017 (PDI Regs)* provides that for the purposes of section 157(1), (2) and (17)(a)(i) of the *PDI Act*, the prescribed qualifications include the qualifications that would be necessary to obtain Accredited Professional – building level 1 or Accredited Professional – building level 2 accreditation under the Accredited Professionals Scheme.

Except for a member approved by the Chief Officer of the CFS, deputy members who meet equivalent membership criteria to that of a BFSC member may, with the approval of the SPC, be appointed to deputise for that member in his/her absence.

The Chief Officer of the CFS may, at their discretion, appoint a deputy member to deputise for the member nominated by the Chief Officer of the CFS, by written notice to the SPC and Council.

Members are appointed for a three (3) year term that will commence on 5 December 2024 and expire on 5 December 2027 unless extended by the State Planning Commission and Council.

The office of a member of the BFSC (with the exception of the member nominated by the Chief Officer of the CFS) will become vacant if a member-

- (a) dies;
- (b) completes a term of office;
- (c) resigns by written notice addressed to the SPC and Council; or
- (d) is removed from office by the SPC for any reasonable cause.

If a position becomes vacant and is subsequently filled, the term of appointment may be adjusted so that it expires on the same day as other members.

### 3. Terms of Reference

To achieve its purpose, the BFSC is required to-

- 3.1 Develop a risk based inspection program for monitoring building fire safety in the Combined Areas, for the purpose of identifying any buildings that may not have adequate fire safety measures.
- 3.2 Undertake building inspections to ascertain whether the fire safety is adequate and identify any inadequate features that could reduce the fire safety, taking into account the extent to which a building meets the fire safety requirements of *Ministerial Building Standard MBS 001 – Upgrading health and safety in existing buildings (Appendix C)*.
- 3.3 Develop a work program for addressing fire safety in buildings identified during inspections as having fire safety defects, which prioritises work on a high risk first basis (according to the potential risk to life safety posed by any fire safety inadequacies).
- 3.4 Subject to clause 3.5, all issues will generally be addressed initially with the building owner or delegate via written communication that will clearly state a response date. If no adequate action has been undertaken after the initial response date, the BFSC will consider the matter and decide on the appropriate form of action to mitigate the risk to life safety.
- 3.5 Plan a course of action to address and remove building fire safety inadequacies on a case by case basis, in accordance with the provisions of section 157 of the *PDI Act*, which may include-
  - (a) Issuing a *Notice of Fire Safety Defect* requiring the building owner to report within two (2) months to the BFSC on the work or other measures necessary to ensure that the fire safety of the building is adequate;

- (b) Allowing the building owner to make representation to the BFSC about the fire safety and to negotiate a cost effective solution that will reduce fire safety risks to an acceptable level and meet the required fire safety performance;
- (c) Issuing a *Notice of Building Work Required* scheduling rectification work that must be carried out to raise the building fire safety to an adequate level of safety; and
- (d) Issuing a notice to prohibit the occupation or use of a building until a fire hazard no longer exists.

3.6 Inform a building owner of their right to appeal a BFSC decision, direction or notice.

3.7 Take enforcement action when necessary to ensure that a building owner complies with a notice issued by the BFSC under section 157 of the *PDI Act*.

3.8 When appropriate, revoke or vary a notice issued by the BFSC under section 157 of the *PDI Act*.

## 4. Administrative procedures

4.1 **Meetings** - the BFSC will meet regularly on a quarterly basis and the following provisions apply -

- (a) In the case of an ordinary meeting of the BFSC, the Chair of the BFSC must give each member of the BFSC notice of a meeting at least five (5) clear business days before the date of the meeting;
- (b) In the case of an electronic meeting to be held by way of electronic means (in whole or in part), the notice must include details of how to connect to the meeting;
- (c) In the case of a special meeting of the BFSC, the Chair must give each member of the BFSC notice of the meeting at least twenty four (24) hours before the commencement of the meeting.

4.2 **Chair** – the Chair of the BFSC is appointed by the Commission. In the event of absence of the Chair at a meeting, the remaining members of the BFSC will elect a member to act as the Chair for that meeting.

4.3 **Quorum** – two (2) members will constitute a quorum at meetings of three (3) members (and one of those members shall be the CFS representative).

4.4 **Decisions** – All decisions of the BFSC shall be made on the basis of a majority decision of the members present. In the event when votes are equally divided, the Chair will have the casting vote.

4.5 **Administrative support** – will be provided by the Building Policy & Programs Team in Planning and Land Use Services and will be in line with procedures outlined in 'Guide to Council Building Fire Safety Committees', including-

- Keeping accurate Minutes;
- Preparing and issuing correspondence and notices;
- Co-ordinating information for Section 7 enquiries;
- Tracking progress of actions; and
- Filing, storing and retrieving records

- 4.6 **Records and reporting** on actions taken by the BFSC will be the responsibility of the Building Policy & Programs Team in Planning and Land Use Services.

An annual report will be provided by the BFSC to the SPC and Council on the fire safety status of buildings in the Combined Areas.

- 4.7 **Conflict of interest** - A member with a personal interest or a direct pecuniary interest in any matter before the BFSC must declare that interest and not take part in any deliberations or decisions of the BFSC in relation to that matter.

- 4.8 **Confidentiality** – A member of the BFSC must not intentionally disclose any confidential information gained by virtue of their official position unless section 236(2) of the *PDI Act* authorises such disclosure.

- 4.9 **Critical Issue Awareness** - When a critical issue is identified, the BFSC will report the issue to the Governance Team in Planning and Land Use Services, who will advise the Chair of the SPC of the issue, and to the Council. The Governance Team will also consult with the SPC Communications Manager to confirm if media strategy is required. The Chair of the SPC will then direct whether:

1. The item is noted in the Chair's Report at the next available SPC Meeting; or
2. A briefing is sent to all SPC members via email for noting out of session.

**Note:** If a media statement is required from the SPC, this will require approval by the full Commission prior to any release.

## 5. Inspection Policy

The following inspection policy has been prepared and endorsed by the SPC and Council for the purposes of –

- Monitoring the fire safety of buildings in the Combined Areas;
- Identifying buildings that do not have adequate fire safety measures;
- Taking appropriate action to improve the fire safety of buildings that have been deemed not adequate;
- Checking that actions required to improve fire safety have been carried out effectively.

The joint BFSC of the SPC and Council will-

- 5.1 Identify buildings offering tourist accommodation along or near major tourist routes in the outback areas (**Appendix D**) and within the Council's area, and program those for an audit fire safety inspection or assessment by the BFSC at the earliest opportunity. Major tourist routes include–

- The Barrier Highway
- The Stuart Highway
- The Eyre Highway
- The Outback Highway

- 5.2 Identify other non-private residential facilities in the Combined Areas that will need to undergo a future fire safety audit inspection by the BFSC at the earliest opportunity.

- 5.3 Establish an inspection program that will ensure -

- Buildings identified with fire safety defects that potentially pose a risk to life safety are inspected and rectified within the next three year period (as appropriate); and
- Tourist accommodation and non-private residential facilities in the Combined Areas undergo a fire safety inspection/ review within a prescribed five year period.

5.4 Carry out programmed building inspections to identify features that adversely affect fire safety, taking into account the extent to which buildings meets the fire safety requirements of *Ministerial Building Standard MBS 001 – Upgrading health and safety in existing buildings*.

## 6. Operating procedures

To achieve its statutory function, the BFSC will operate in line with the following procedures-

- 6.1 Initially, a desk top analysis of accommodation buildings and non-private residential facilities in the Combined Areas will be carried out by the Building Policy & Programs Team to identify those that should be included in an inspection program.
- 6.2 Develop an inspection program scheduling fire safety inspections to be carried out of identified buildings by a member of the BFSC.
- 6.3 Contact the owners of buildings identified and programmed for inspection and advise them of the BFSC's intention to inspect the fire safety of their building.
- 6.4 Undertake programmed building inspections and identify any fire safety inadequacies that will need to be addressed. The fire safety inspections will initially be carried out between March and October of each year (in order to avoid the hottest months of the year), by the BFSC member who is authorised under the *Fire and Emergency Services Act 2005* to enter and inspect buildings and report back to the BFSC on the fire safety status of each building inspected.
- 6.5 Members of the BFSC have the power to enter and inspect buildings under section 157(1) of the *PDI Act*, irrespective of their status as "authorised officers" under the *PDI Act*. Members of the BFSC who are also authorised officers approved under section 210 of the *PDI Act*, may also exercise additional powers under section 211 of the *PDI Act*. The member of the BFSC approved by the Chief Officer of the CFS must also be an authorised officer under Part 3 Division 5 or section 86 of the *Fire and Emergency Services Act 2005*, which provides additional powers to that member.
- 6.6 Following an inspection, the BFSC will consider the extent to which an inspected building meets the fire safety requirements of Part 3 of *Ministerial Building Standard 002 – Upgrading health and safety in existing buildings* and identify any inadequacies.
- 6.7 The BFSC will take appropriate action to inform building owners of any identified fire safety inadequacies, giving them the opportunity to report back to the BFSC within a specified time on work or other measures they intend carrying out to make the fire safety adequate.
- 6.8 The BFSC will consider any reports submitted by building owners and, if necessary, negotiate an agreed program of work that will reduce fire safety inadequacies identified during an inspection.
- 6.8 When necessary, the BFSC will take appropriate action, including enforcement action when necessary to ensure that building owners undertake rectification work(s) to improve fire safety of a building, which may include-

- Issuing, varying or lifting a Notice of Fire Safety Defect.
- Issuing, varying or lifting a Notice of Building Work Required.
- Issuing, varying or lifting a notice to prohibit the occupation or use of a building until a fire hazard no longer exists.
- Instigating prosecution and/or enforcement action when necessary, e.g. applying to the Environment, Resources and Development (ERD) Court to commence proceedings for an enforcement order to be issued.

- 6.9 The BFSC will monitor and record progress of rectification work and the ongoing fire safety of buildings in the Combined Areas.
- 6.10 The BFSC will report annually to the SPC and Council on the fire safety status of buildings in the Combined Areas.
- 6.11 The BFSC will conduct their onsite inspections in accordance with the any requirements for travel set by the Department for Housing and Urban Development.

## Appendix A – Extract from the *Planning, Development and Infrastructure Act 2016*

### 157—Fire safety

- (1) An authorised officer who holds prescribed qualifications or a member of an appropriate authority may, at any reasonable time, enter and inspect any building for the purpose of determining whether the fire safety of a building is adequate.
- (2) An authorised officer who holds prescribed qualifications must conduct an inspection of a building under subsection (1) at the request of an appropriate authority or a fire authority.
- (3) If an appropriate authority is satisfied that the fire safety of a building is not adequate, the appropriate authority may cause a notice to be served on the owner of the building.
- (4) A notice under subsection (3) may—
  - (a) Require the owner to report to the appropriate authority on the work or other measures necessary to ensure that the fire safety of the building is adequate; or
  - (b) In the case of an emergency—
    - (i) Require the owner to carry out a program of work, or to take any other measure, to overcome any fire hazard; or
    - (ii) Require the evacuation of the building; or
    - (iii) Prohibit the occupation or use of the building or a part of the building until the appropriate authority is satisfied that the fire hazard no longer exists; or
    - (iv) Require the owner to take such other action prescribed by the regulations.
- (5) A report under subsection (4)(a) must be provided to the appropriate authority within 2 months, or within such longer period as the appropriate authority may allow.  
Maximum penalty: \$2 500.
- (6) The owner may, during the period referred to in subsection (5), make representations to the appropriate authority about the fire safety of the building and the work or other measures to be carried out or taken.
- (7) An appropriate authority may, after receiving a report under subsection (4) (or, in the event of a failure to provide a report in accordance with this section), by notice given to the owner of the building—
  - (a) Require the owner to seek an appropriate development authorisation under this Act and, if granted, to carry out a program of work or to take other measures to ensure that the fire safety of the building is adequate; or
  - (b) Prohibit the occupation or use of the building or a part of the building until the appropriate authority is satisfied that any fire hazard no longer exists; or
  - (c) Require the owner to take such other action prescribed by the regulations.
- (8) On completion of any work required to be carried out by a notice under this section, the owner must notify the appropriate authority in writing.  
Maximum penalty: \$2 500.
- (9) An appropriate authority may, at the request of the owner, vary a notice under this section or may, on its own initiative, revoke a notice if satisfied that it is appropriate to do so.
- (10) An appeal against a notice under this section must be commenced within 14 days after the notice is given unless the Court allows longer time for the commencement of the appeal.
- (11) Subject to any order of the Court to the contrary, the operation of a notice under this section is not suspended pending the determination of an appeal.
- (12) A person who contravenes or fails to comply with a notice under subsection (4)(b) or (7) is guilty of an offence.  
Maximum penalty: \$20 000.  
Default penalty: \$200.
- (13) This section does not authorise any action inconsistent with the *Heritage Places Act 1993* or a provision of the Planning and Design Code that relates to heritage.

- (14) Any action taken under this section should seek to achieve (in the following order of priority)—
- (a) Firstly, a reasonable standard of fire safety for the occupiers of the relevant building;
  - (b) Secondly, the minimal spread of fire and smoke;
  - (c) Thirdly, an acceptable fire fighting environment.
- (15) No matter or thing done or omitted to be done by an appropriate authority in good faith in connection with the operation of this section subjects the authority to any liability.
- (16) For the purposes of this section, an **appropriate authority** is a body established by a council, or by 2 or more councils, under subsection (17) and designated by the council or councils as an appropriate authority under this section.
- (17) The following provisions apply with respect to the establishment of an appropriate authority:
- (a) The appropriate authority will be constituted of—
    - (i) A person who holds prescribed qualifications in building surveying appointed by the council or councils; and
    - (ii) An authorised officer under Part 3 Division 5 or section 86 of the *Fire and Emergency Services Act 2005* who, depending on the location of the council area or areas, has been approved by the Chief Officer of the relevant fire authority to participate as a member of the appropriate authority; and
    - (iii) A person with expertise in the area of fire safety appointed by the council or councils; and
    - (iv) If so determined by the council or councils—a person selected by the council or councils;
  - (b) The council or councils may specify a term of office of a member of the appropriate authority (other than a member under paragraph (a)(ii));
  - (c) The office of a member of the appropriate authority (other than a member under paragraph (a)(ii)) will become vacant if the member—
    - (i) Dies; or
    - (ii) Completes a term of office and is not reappointed; or
    - (iii) Resigns by written notice addressed to the council or councils; or
    - (iv) Is removed from office by the council or councils for any reasonable cause;
  - (d) Deputy members may be appointed;
  - (e) Subject to a determination of the council or councils—the appropriate authority may determine its own procedures (including as to quorum).
- (18) A member of an appropriate authority who has a personal interest or a direct or indirect pecuniary interest in any matter before the appropriate authority (other than an indirect interest that exists in common with a substantial class of persons) must not take part in any deliberations or decision of the authority in relation to that matter.

## Introduction

Local government councils play an important role in protecting the ongoing safety of building occupiers and users through the provisions of the *Planning, Development and Infrastructure Act 2016* (the PDI Act).

Section 157 of the PDI Act establishes the power for a council to investigate whether building owners are maintaining proper levels of fire safety in their buildings for the protection of all occupiers, whether they be residents and workers who use them regularly, or clients and visitors who only use them occasionally.

An appropriately qualified 'authorised officer' from a council or a member of a Building Fire Safety Committee, as an 'appropriate authority' under the PDI Act, can inspect existing buildings to check if the fire safety is adequate. If not, a Building Fire Safety Committee can take action to require the owner to upgrade the fire safety of the building to an appropriate level.

For the purposes of this Guide, the term 'Building Fire Safety Committee' means an 'appropriate authority' under section 157 of the PDI Act.

This guide is designed to -

- Assist councils and Building Fire Safety Committee members to understand their roles and responsibilities with regard to fire safety of existing buildings; and
- Outline suggested procedures and protocols that a Building Fire Safety Committee may follow.

## Building Fire Safety Committee Protocols

### What is the role of a Building Fire Safety Committee?

The role of a Building Fire Safety Committee includes -

- Developing appropriate building fire safety inspection policies for existing buildings based on the likely fire safety risks that could arise depending on the building use and occupant characteristics;
- Scrutinising the fire safety of buildings that have been identified as having fire safety provisions that are not adequate;
- Issuing of a notice to the building owner (where a Building Fire Safety Committee determines that the fire safety of a building is not adequate) identifying inadequacies that need to be addressed or rectified to an extent that will provide an adequate level of safety for the occupants;
- Forwarding information on any fire safety notices issued by the Building Fire Safety Committee to council administration for Section 7 enquiries (made by a vendor when a building is available for sale or lease - refer Appendix D);
- Where appropriate, negotiating a cost effective solution with a building owner that will reduce fire safety risks to an acceptable level and meet the required fire safety performance;
- Issuing notices that schedule rectification work that must be carried out in order to raise the building fire safety to an adequate level of safety or in high risk situations issuing notices that prohibit the occupation or use of a building until a fire hazard no longer exists;
- Initiating enforcement or other action to ensure a building owner complies with a section 157 notice; and
- Revoking or varying fire safety notices when appropriate.

### How does Council establish a Building Fire Safety Committee?

The process for a council to establish a Building Fire Safety Committee is generally as follows -

1. Decide whether to have a stand-alone Building Fire Safety Committee to serve its council area, or to have an agreement with one or more adjoining councils to form a regional Building Fire Safety Committee;
2. Select and appoint appropriate Building Fire Safety Committee members;
3. Appoint the Building Fire Safety Committee under Section 157 of the PDI Act;
4. Note and support council inspection policies for building fire safety;
5. Appoint one or more appropriately qualified authorised officers, who may enter and inspect the fire safety of existing buildings; and
6. Provide administrative support to the Building Fire Safety Committee.

If a regional Building Fire Safety Committee is appointed, agreement will need to be reached on matters such as cost sharing arrangements for legal proceedings etc.

### Who can be a member of a Building Fire Safety Committee?

A Building Fire Safety Committee is required to have at least 3 members, of whom-

- (a) One must be a person with prescribed qualifications in building surveying appointed by the council or councils;
- (b) One must be an authorised officer under Part 3 Division 5 or section 86 of the *Fire and Emergency Services Act 2005* who, depending on the location of the council or areas, has been approved by the Chief Officer of the relevant fire authority to participate as a member of the Building Fire Safety Committee; and
- (c) One must be a person with expertise in the area of fire safety appointed by the council or councils.

Councils have the option of appointing a fourth member to a Building Fire Safety Committee, who may be-

- (d) Any person the council or group of councils considers appropriate to nominate.

In relation to member (b) from the Fire Services, the council or group of councils will need to write to the Chief Officer relevant to its area of jurisdiction, asking that an officer be nominated for appointment to its Building Fire Safety Committee.

For areas under the jurisdiction of the Metropolitan Fire Services (MFS) contact -

The Chief Officer  
SA Metropolitan Fire Service  
GPO Box 98 ADELAIDE SA 5001  
[www.mfs.sa.gov.au](http://www.mfs.sa.gov.au)

For areas under the jurisdiction of the Country Fire Services (CFS) contact -

The Chief Officer  
SA Country Fire Service  
GPO Box 2468 ADELAIDE SA 5001  
[www.cfs.sa.gov.au](http://www.cfs.sa.gov.au)

For areas with dual jurisdiction (MFS and CFS), it would be advisable to contact both jurisdictions and ask that they collaborate with each other and nominate the most appropriate officer.

In relation to member (c), 'a person with expertise in the area of fire safety', this person would be expected to have significant practical and technical knowledge and experience in the principles of building fire safety, including (but not limited to) -

- Detection;
- Communication;
- Evacuation;
- Containment; and
- Extinguishment.

With regard to member (d), the Council has the option of appointing any person it considers appropriate under their particular circumstances. In some cases the Council may decide to appoint a fourth member on an as needs basis. For example, using a fire engineer or other expert to match knowledge with building types and complexity of fire safety issues.

The council may also specify a term of office of a member of a Building Fire Safety Committee.

### **Deputy members**

Deputies can be appointed and it is recommended that a deputy for each member is nominated when the Building Fire Safety Committee is established to ensure that meetings are held at the appropriate times.

### **Conflict of interest**

Under the PDI Act, a member of a Building Fire Safety Committee who has a personal interest or a direct or indirect pecuniary interest in any matter before the Building Fire Safety Committee must not take part in any deliberations or decisions of the Building Fire Safety Committee in relation to that matter.

## **What policies and procedures need to be considered and/or established by a Building Fire Safety Committee?**

Once established, a Building Fire Safety Committee will need to determine its procedures and protocols. These are likely to include -

- Where and how often it will meet;
- How many members constitute a quorum;
- Who will chair the meetings;
- Who will act as the minute secretary;
- How records are to be kept, filed and stored;
- What types/classes of buildings are to be scrutinised;
- Who the Council has appointed as authorised officer to undertake inspections;
- Procedures for Building Fire Safety Committee inspections;
- Appropriate formats for fire safety notices, correspondence etc;
- Procedures for issuing, varying and revoking notices; and
- Procedures for prosecutions/appeals.

### **Meeting procedures and protocols**

A Building Fire Safety Committee will need to meet on a regular basis to consider and determine matters such as -

- Appropriate action to take following a fire safety inspection;
- Whether upgrading works outlined in a fire safety report submitted by an owner are appropriate;
- Negotiating and agreeing appropriate performance solutions with building owners;
- Issuing, varying or lifting fire safety notices;
- Monitoring progress and checking if owners are complying with fire safety notices; and
- Procedures for instigating prosecution and/or enforcement action.

The Building Fire Safety Committee may decide to meet monthly until it has had an opportunity to assess the particular needs of the area.

### **Quorum**

It is recommended that for a 3-member Building Fire Safety Committee, two members should constitute a quorum and that one of those members be the Fire Services representative.

For a 4-member Building Fire Safety Committee, it is recommended that three members should constitute a quorum and that one of those members be the Fire Services representative.

Each Building Fire Safety Committee will need to determine what to do if a majority decision cannot be reached. Some options include-

- Provisions for one particular member (e.g. the Chair) to have a second or casting vote; or
- Deferral until a majority decision can be reached.

### **Chair**

It is recommended that each Building Fire Safety Committee has a Chairperson to preside at meetings. It may be that member (a) who has building surveying qualifications would be the most appropriate person for this role, however, this is not mandatory. In the absence of the Chair, the Committee should appoint the next most appropriate person to preside at meetings.

### **Secretarial and administrative support**

A council or group of councils may provide a staff member to act as secretary to the Building Fire Safety Committee, or the Building Fire Safety Committee may decide that one of its members will undertake this function.

Regardless of the administrative support, it is important that proper, accurate minutes and records be kept of Building Fire Safety Committee proceedings and actions, as they may later form the basis of -

- Legal proceedings should an appeal be made against a decision of the Building Fire Safety Committee; or
- A history of sites with recurrent issues over long periods of time.

Irrespective of who will take minutes, additional administrative support will need to be provided by council(s) to -

- Prepare and issue correspondence and notices;
- Co-ordinate information for Section 7 enquiries;
- Track progress of actions; and
- File, store and retrieve records.

*[Refer to Appendix D for details of Section 7 statements and Appendix E for examples of standard letters that may be useful]*

### **Specialist support**

The Building Fire Safety Committee will need to check if the council(s) has appointed an appropriately qualified authorised officer to undertake fire safety inspections of buildings in its area, and if procedures are in place for forwarding fire safety reports to the Building Fire Safety Committee.

### **Inspection policy**

Once appointed, a Building Fire Safety Committee will need to develop a broad policy that sets out the basis for undertaking building inspections for fire safety purposes. Inspections must be carried out at the request of the fire authority, but may also be carried out when -

- (a) A complaint is received;
- (b) On an audit basis; or
- (c) On a targeted high risk basis.

In determining its policy, a Building Fire Safety Committee should have regard to the types of buildings and/or occupancies within its area of jurisdiction to identify those that may constitute a high fire safety risk and need to be systematically inspected. For instance-

- Buildings that provide overnight accommodation for unrelated persons; or
- Buildings where large crowds congregate during operating hours, such as shops or assembly buildings might be identified as a high-risk priority.

When a Building Fire Safety Committee has determined its policy on buildings to be scrutinised, it would be good practice to have that policy noted by the elected council member..

A fire safety inspection policy also needs to address how the policy is to be monitored.

### **What does a Building Fire Safety Committee consider when assessing if the fire safety of an existing building is adequate?**

If an authorised officer or a fire authority has inspected a building and considers the fire safety is not adequate, the Building Fire Safety Committee will then need to identify what features of the building make the fire safety inadequate. Section 157 of the PDI Act, sets out the priorities for assessing and upgrading the fire safety risks of an existing building (in order of priority) as-

- Firstly, a reasonable standard of fire safety for the occupiers of a building
- Secondly, the minimal spread of fire and smoke
- Thirdly, an acceptable fire-fighting environment,

in accordance with the fire safety objectives and performance criteria of the *Building Code*.

The fire safety of an existing building is not considered adequate if-

- (a) building occupants are not able to evacuate safely during a fire, due to-
  - (i) blocked or obstructed exits;
  - (ii) obstructions in exits and paths of travel to exits;
  - (iii) width of exits and paths of travel to exits are not adequate to cater for the number of occupants;
  - (iv) fire and/or smoke spreading to exits and evacuation routes through unprotected openings, damage to fire resisting building elements or lack of smoke control features;
  - (vi) fire hazards or excessive fire loads that could impede evacuation (which may include combustible floor coverings, ceilings, wall linings and wall claddings);
  - (vii) insufficient exits to cater for the number of occupants;
  - (viii) excessive travel distances to exits;
  - (ix) door hardware and/or direction of door swings in exits that are likely to impede safe evacuation;
  - (x) inadequate lighting is available for occupants to locate and use exits during an emergency;
  - (xi) no first attack fire-fighting facilities available for occupant use; or
  - (xii) building occupants will not receive adequate warning of a fire or other emergency to enable them to evacuate to a safe place;
- (b) occupants using exits and paths of travel to exits are not protected from the effects of smoke and fire (e.g. by fire resisting construction, by use of non-combustible materials, by use of materials that have low fire hazard properties, by use of a smoke control system or fire suppression system), and/or

- (c) the fire brigade cannot access or use existing fire services and equipment needed for fire-fighting operations and to assist safe evacuation.

When the fire safety of a building is not adequate, the role of a Building Fire Safety Committee is to work with the building owner to develop a cost effective solution that will make the fire safety of the building adequate.

*Ministerial Building Standard MBS 001 – Upgrading health and safety in existing buildings* outlines the general requirements for fire safety in existing buildings. Sections 301 to 331 of that Standard have performance requirements and deemed-to-satisfy provisions for fire safety in existing buildings and Appendix B4 of the Standard expands on the fire safety priorities required by the PDI Act, which are-

#### **1. A reasonable standard of fire safety for the occupiers of a building**

A reasonable standard of fire safety can be achieved where occupants are alerted to a fire in the building and are able to find and use exits and evacuation routes to evacuate to a safe place before being overcome by the effects of smoke or fire.

Safe evacuation can be achieved if-

- Occupants, particularly sleeping occupants, are alerted to a fire in the building as soon as possible;
- The number, dimensions, location, operation and visibility of exits and evacuation routes are sufficient to enable the number of occupants to evacuate safely;
- Occupants using exits and evacuation routes to evacuate are protected from the effects of smoke and/or fire during the time needed for safe evacuation; and
- The building will maintain structural stability for the period of time needed for building occupants to evacuate to a safe place before being overcome by smoke or fire.

Occupants can be protected during evacuation through the use of-

- non-combustible and/or fire or smoke resisting building elements where necessary to-
  - delay or prevent fire from damaging structural elements in exits and evacuation routes;
  - prevent smoke and/or fire spreading to exits and evacuation routes;
  - reduce travel distances and allow occupants more time to reach exits and evacuation routes;
  - contain or separate special fire hazards from exits and evacuation routes.
- additional exits to decrease travel times needed to reach an exit;
- fire extinguishers for occupants to use to undertake initial fire attack;
- fire hose reels where appropriate and available for occupants to use to undertake initial fire attack;
- fire hazard reduction strategies (eg reducing fire loads that could arise from storage of highly combustible materials or goods);
- early fire suppression systems such as sprinklers where appropriate to-
  - delay or prevent fire from damaging structural elements in exits and evacuation routes;
  - prevent smoke and/or fire spreading to exits and evacuation routes;
  - permit extended travel distances and still allow occupants time to reach exits and evacuation routes;
  - suppress a fire arising from an identified fire hazard;
- a smoke extraction system to keep smoke above a safe level within exits and evacuation routes.

## 2. Minimal spread of fire and smoke

Minimal spread of fire and smoke can be achieved if smoke and fire spread to evacuation routes is minimised to the extent necessary to enable occupants to reach exits and evacuation routes before being overcome by the effects of smoke or fire.

Smoke and fire spread can be minimised through the use of-

- fire or smoke resistant construction where necessary to-
  - delay or prevent fire from damaging structural elements in evacuation routes;
  - prevent smoke and/or fire spreading to and within evacuation routes, from one fire compartment to another, or from one storey to another storey;
  - allow occupants more time to use evacuation routes to reach exits.
- an early fire suppression sprinkler system where necessary to-
  - delay or prevent fire from damaging structural elements in evacuation routes;
  - reduce fire and/or smoke spreading within evacuation routes, from one fire compartment to another fire compartment, or from an identified fire hazard;
  - allow occupants more time to use evacuation routes to reach exits.
- a smoke extraction system to keep smoke above a safe level within evacuation routes, or from spreading from one fire compartment to another fire compartment.
- early fire brigade intervention where fire-fighting facilities are available and where the building or occupant characteristics are such that they need to rely on fire brigade intervention for safe evacuation.

## 3. An acceptable fire-fighting environment

An acceptable fire-fighting environment can be achieved if the fire brigade is able to safely access and use facilities needed for its fire-fighting operations.

Safe access and facilities needed for fire-fighting operations may include-

- Where provided, a fire hydrant system or other water supply system for fire-fighting purposes that is suitable for use by the fire brigade
- Where provided, fire monitoring connections to the fire brigade are working as required
- Where provided, a fire control centre/room is protected from fire/smoke spread and has working equipment suitable for use by the fire brigade for its fire-fighting operations
- The building maintaining structural stability and resisting the spread of fire and smoke to the extent necessary for the fire brigade to safely access and use facilities provided for its fire-fighting operations.

## Issuing of Notices

A Council Building Fire Safety Committee can serve a notice under section 157(3) of the PDI Act on the owner of the building (in a form similar to the Notice of Fire Safety Defect as provided in Appendix A of this Standard) if it believes that the fire safety of a building is not adequate.

It is advisable for a Building Fire Safety Committee to inspect a building before issuing a Section 157(3) notice so that it can make better informed decisions regarding the fire safety adequacy and extent of upgrading work it may require.

Before undertaking an inspection, the Building Fire Safety Committee should advise the building owner in writing of its intention to do so, to give the owner the opportunity to be present during the inspection.

Under the PDI Act, the Building Fire Safety Committee can authorise the following fire safety notices to be served on a building owner -

- Section 157(3) Notice of Fire Safety Defect; and
- Section 157(7) Notice of Building Work or Other Actions Required.

In order to reduce exposure to criticism or legal challenge it would be advisable to have at least two members of a Building Fire Safety Committee sign notices issued under Section 157 of the PDI Act.

It may also be appropriate to seek legal advice regarding any notices before they are issued to ensure technical and procedural soundness and avoid exposure to actions in relation to due process.

The Building Fire Safety Committee can vary or revoke a fire safety notice at any time if it is satisfied that it is appropriate to do so. For example, the Building Fire Safety Committee should revoke a Notice of Building Work or Other Actions Required once it is satisfied that the prescribed works scheduled in the notice have been completed.

Both the building owner and the council administration responsible for providing information for Section 7 enquiries must be notified of any change to a fire safety notice.

## **Why are Fire Safety Notices issued and what should they include?**

### **Section 157(3) Notice of Fire Safety Defect**

A Notice of Fire Safety Defect (as issued under section 157(3) of the PDI Act) is issued to alert the building owner that the building fire safety is not considered adequate, and that certain work needs to be undertaken to rectify the situation.

The PDI Act stipulates that such a notice may require -

- The owner to report to the Building Fire Safety Committee on building work or other measures necessary to ensure that the fire safety of the building is adequate; or
- In the case of an emergency, require the owner to carry out a program of work, or other measures to overcome any fire hazard, which may include evacuation of the building or part of a building until the Building Fire Safety Committee is satisfied that the fire hazard no longer exists.

A list of building fire safety matters that the Building Fire Safety Committee considers are not adequate may be attached as a schedule to the Notice of Fire Safety Defect. The maximum amount of time allowed for an owner to report to council (as required by a Notice of Fire Safety Defect) is two months unless the Building Fire Safety Committee specifically agrees to a longer period. During this time the building owner can make representations to the Building Fire Safety Committee about the fire safety of the building and work or other measures to be carried out.

The Notice of Fire Safety Defect should also inform the owner of his/her right to appeal within 14 days to the Environment, Resources and Development (ERD) Court if he or she disputes anything in the notice or schedule.

A suggested format for a Section 157(3) Notice of Fire Safety Defect can be found in Appendix A.

Information regarding fire safety notices must be declared by the council if a Section 7 enquiry is made to the council. *[Refer to Appendix D]*

### **Section 157(7) Notice of Building Work or Other Actions Required**

A Notice of Building Work or Other Actions Required (as issued under section 157(7) of the PDI Act) is issued to require a building owner to undertake appropriate upgrading work to rectify the fire safety of the building.

The PDI Act stipulates that such a notice may -

- Require the owner to seek development authorisation to carry out a program of work or other measures to make the fire safety of the building or structure adequate; or
- Prohibit occupation of the building, or part of the building, until the Building Fire Safety Committee is satisfied that the fire hazard no longer exists.

*Ministerial Building Standard MBS001 – Upgrading health and safety in existing buildings* provides performance requirements and deemed-to-satisfy provisions for achieving acceptable levels of fire safety in existing buildings, against which a program of work or other proposed measures can be assessed.

In addition, a schedule detailing the program of work or other measures to be undertaken must be attached as a schedule to a section 157(7) Notice of Building Work or Other Actions Required.

A section 157(7) Notice of Building Work or Other Actions Required must also stipulate a period of time in which the prescribed works are to be completed. The specified time period may include time for the owner to obtain development approval (if required).

It is recommended that when issuing a section 157(7) Notice of Building Work or Other Actions Required, the Building Fire Safety Committee informs the owner of the right to appeal within 14 days to the ERD Court if they disputes anything in the notice or schedule.

A suggested format for a section 157(7) Notice of Building Work or Other Actions Required is included in Appendix B.

Information regarding fire safety notices must be declared by the council in Section 7 statements. *[Refer to Appendix D]*

### **Prescribed building work**

When determining what work is appropriate to include in a schedule or program of prescribed building work (forming part of a section 157(7) Notice of Building Work or Other Actions Required), it is recommended that the Building Fire Safety Committee take a performance approach and take the following into consideration-

- Any representation made by the building owner;
- Any report/s submitted by the building owner;
- Any risk analysis undertaken of the building by the building owner;
- Any action plans previously prepared by the building owner to eliminate or minimise identified risks at the earliest opportunity, including those identified by the Building Fire Safety Committee; and
- The possible staging of the work to minimise possible financial hardship for the building owner.

### **Staged works**

A Building Fire Safety Committee may allow an owner to undertake fire safety rectification work in stages, provided that the agreed program of work eliminates or minimises risks that threaten the life safety of occupants as a first priority.

Staging the works can reduce the cost burden for an owner to a manageable level. It may also be useful in cases where the building owner elects to take the opportunity to progressively upgrade the whole building to meet current Building Code requirements (i.e. over and above the elimination of urgent high priority risks).

## **What rights and obligations does a building owner have in relation to actions by a Building Fire Safety Committee?**

### **Fire safety notices**

A building owner served with a Section 157(3) Notice of Fire Safety Defect has two months (or a longer period if a time extension is negotiated with the Building Fire Safety Committee) in which to develop an appropriate upgrading proposal and report to the Building Fire Safety Committee on work or measures proposed to be undertaken to make the fire safety of the building adequate.

A building owner can -

- During that period make representations to the Building Fire Safety Committee about the fire safety of the building and the work or other measures that need to be carried out;
- Apply to the Building Fire Safety Committee at any stage to have a fire safety notice varied or revoked; or
- Appeal to the ERD Court against the service of a notice under Division 6 of the PDI Act.

An owner must comply with a fire safety notice or risk prosecution and/or enforcement action through the ERD Court.

On completion of any work required by a fire safety notice, the owner must notify the Building Fire Safety Committee in writing that the work has been completed.

### **Appeals with the ERD Court**

Appeals are lodged with and determined by the ERD Court.

An appeal must be lodged within 14 days after a notice is given unless the Court allows longer time.

The operation of a fire safety notice is not suspended pending the determination of an appeal, unless the ERD Court orders otherwise.

To initiate an appeal the applicant must -

- Submit a notice of appeal with the ERD Court; and
- Pay the prescribed fee.

A notice of appeal must be in writing, in a form determined by the ERD Court, setting out the grounds of the appeal, with a copy of the disputed notice attached.

The Building Fire Safety Committee may only become aware of the appeal when the notice of appeal is served on them by the ERD Court.

## **What does a Building Fire Safety Committee do if a building owner fails to comply with a notice?**

If a building owner fails to comply with a notice, the Building Fire Safety Committee can apply to the ERD Court for an enforcement order, and/or apply for a summons to be issued for the defendant to appear at a prosecution hearing (both procedures can run concurrently).

### **Prosecution**

A building owner is guilty of an offence if he/she contravenes or fails to comply with a fire safety notice. The maximum penalties are -

- Failure to comply with a notice under section 157(4)(b) or 157(7) is an offence with a maximum penalty of \$20,000 and a default penalty of \$200 (payable for every day that the owner continues to fail to comply).
- A maximum penalty of \$2500 applies for-
  - failure to comply with a notice and provide a report within 2 months to the Building Fire Safety Committee as required under section 157(4)(a) of the PDI Act; and
  - failure to notify the Building Fire Safety Committee that the work has been completed as required under section 157(8) of the PDI Act.

Offences under the PDI Act lie within the criminal jurisdiction of the ERD Court. A prosecution may be commenced within 3 years after the date of the alleged offence or at a later date with the authorisation of the Attorney General.

With any ERD Court activities the Building Fire Safety Committee must provide reasonable information to the Court as to the nature of the charge including a statement of the specific offence with reference to the relevant section of the PDI Act.

A summons for appearance of defendant (in duplicate) will -

- Be directed to the defendant charged by the information;
- State shortly the matter charged; and
- Require the defendant to appear before the Court at a specified time and place to answer the charge.

#### **Enforcement of notices**

The Building Fire Safety Committee may apply to the ERD Court for an order to remedy or restrain a breach of the PDI Act.

If the Court is satisfied on the balance of probabilities that the respondent has breached the PDI Act, the Court may make an order requiring the respondent to comply with the order or take any other action as the Court thinks fit under the circumstances. This can include ordering the respondent to pay penalties for failing to comply with a notice as prescribed in the regulations.

#### **Application to Court for an enforcement order**

A Building Fire Safety Committee can commence proceedings for an enforcement order by filing the following documents with the ERD Court -

- (a) An application seeking leave to serve a summons;
- (b) The summons in respect of which leave is sought;
- (c) One or more supporting affidavits; and
- (d) Where the applicant brings the proceedings in a representative capacity, a memorandum.

Every application must -

- Be in writing and give the full name of the applicant;
- Identify the person or persons on whom it is sought to serve the summons;
- Specify the address for service of the applicant and, if available, the telephone and facsimile numbers of the applicant; and
- Be signed by the applicant, or on his or her behalf by a solicitor, agent or other representative.

Every summons must be in a format prescribed by the ERD Court Rules. An example of a summons is given in Appendix C.

Every accompanying affidavit must set out -

- The facts and circumstances upon which the applicant relies; and
- The name, address, telephone and facsimile numbers of any person who, in the opinion of the deponent, either has or might reasonably be expected to have a legal or equitable interest in the land the subject of the application.

Every memorandum must specify all the people or organisations upon behalf of whom or which the proceedings are brought and signed by all the people or organisations in such manner as shows that all the people or organisations consent to the proceedings being brought on their behalf.

#### **Leave to serve a summons**

On hearing an application to serve a summons, the ERD Court may refuse to grant the application or amend or strike out part of the summons.

If leave is granted by the Court to serve a summons it must be issued within one month of the leave being granted, and once issued it remains in force for three months unless the Court extends such period.

As soon as is reasonably practicable after a summons and accompanying affidavits have been served, the applicant must file an affidavit verifying such service.

#### **Non Compliance with Court order**

A person who fails to comply with a Court order shall be guilty of contempt of Court and be liable to imprisonment or a fine or both.

## Appendix A

### Example of a Section 157(3) Notice of Fire Safety Defect

#### Section 157(3) NOTICE OF FIRE SAFETY DEFECT

In the matter of the *Planning, Development and Infrastructure Act 2016* and the premises situated at *[insert name and location of premises]*

TO: The Owner/s

*[Insert name of premises]*

c/-*[Insert name of owner's representative]*

*[Insert postal address of owner's representative]*

TAKE NOTICE that whereas the *[insert name of council or council region]* Building Fire Safety Committee (hereinafter referred to as 'the Committee') or an authorised officer of the council has inspected the building situated at *[insert location details of premises]*:

TAKE NOTICE that the said Committee is satisfied that the fire safety of the building so inspected is not adequate and, pursuant to Section 157(3), (4) and (5) of the said *Planning, Development and Infrastructure Act 2016*, hereby gives notice that you are required to report within two months to the Committee on the work or other measures necessary to ensure that the fire safety of the building is adequate.

PURSUANT TO the provisions of Section 157(6) of the said *Planning, Development and Infrastructure Act 2016* you may, during the period of two months commencing upon the date of issue of this notice, make representations to the Committee about the fire safety of the building and the work or other measures to be carried out or taken.

PURSUANT TO the provisions of Section 157(10) of the said *Planning, Development and Infrastructure Act 2016*, if you dispute the propriety of any requisition contained in this notice, you have 14 days in which to lodge an appeal with a registry of the Environment, Resources and Development Court.

Dated at.....this .....day of.....in the year two thousand and.....

## Appendix B

### Example of Section 157(7) Notice of Building Work or Other Actions Required

#### SECTION 157(7) NOTICE OF BUILDING WORK OR OTHER ACTIONS REQUIRED

In the matter of the *Planning, Development and Infrastructure Act 2016* and the premises situated at *[insert name and location of premises]*

TO: The Owner/s

*[Insert name of premises]*

c/- *[Insert name of owner's representative]*

*[Insert postal address of owner's representative]*

TAKE NOTICE that whereas the *[insert name of council or council region]* Building Fire Safety Committee (hereinafter referred to as 'the Committee') did, by notice dated *[insert relevant date]* advise that it considered that the fire safety of the building situated at *[insert location details of premises]*, was not adequate, and required you to report to the Committee on the work or other measures necessary to ensure that the fire safety of the building is adequate; and

TAKE NOTICE that during the period of two months, commencing upon the date of issue of the said notice, such representations as were made on your behalf were considered by the Committee, now therefore

TAKE NOTICE that pursuant to the provisions of Section 157(7) of the said *Planning, Development and Infrastructure Act 2016*, the Committee hereby gives you notice of building work or other measures, which it requires you to carry out within *[insert appropriate period of time]* from the date of issue of this notice. The building work or other measures required are set out in the attached schedule.

The building work required is to be completed in the following stages-

Stage 1 *[insert date by which stage 1 must be completed]*

Stage 2 *[insert date by which stage 2 must be completed]*

Stage 3 *[insert date by which stage 3 must be completed]*

Before commencing any building work you are required to obtain a development approval from the council. Time has been allowed in the program of work for obtaining development approval.

PURSUANT TO the provisions of Section 157(10) of the said *Planning, Development and Infrastructure Act 2016*, if you dispute the propriety of any requisition contained in this notice, you have 14 days in which to lodge an appeal with a registry of the Environment, Resources and Development Court.

#### 1. Letter to owner that the Building Fire Safety Committee wishes to inspect premises

Date

*[Insert name of property owner] [Insert name of property]*

*[Insert postal address for property owner]*

Dear Sir/Madam

*[Insert property name, and property location]* – **Building Fire Safety Inspection**

*[Insert as appropriate - 'an authorised officer from the council' or 'an authorised officer from the Fire Services']* has inspected the fire safety of the above premises and reported to the *[insert name of council or regional council area]* Building Fire Safety Committee that the fire safety of the building is not considered adequate to protect the safety of the occupants should a fire occur in the building.

Where the fire safety of a building is not considered adequate, a Building Fire Safety Committee is empowered under Section 157 of the *Planning, Development and Infrastructure Act 2016* to serve notice on the building owner requiring the owner to undertake actions to improve the fire safety to an adequate level.

Before serving any such notice, the Building Fire Safety Committee wishes to undertake its own inspection of fire safety of the above premises. Could you please contact *[insert details]* on *[insert details]* to arrange a convenient time for this inspection.

Yours sincerely

*[Insert name of Chairperson]*

CHAIR

BUILDING FIRE SAFETY COMMITTEE

*[Insert name of council or regional council area]*

## 2. Letter associated with issuing a Section 157(3) Notice of Fire Safety Defect

Date

*[Insert name of property owner] [Insert name of property]  
[Insert postal address for property owner]*

Dear Sir/Madam

*[Insert property name, and property location]* – **Building Fire Safety**

The *[insert name of council or regional council area]* Building Fire Safety Committee inspected the fire safety of the above premises on *[insert date]*. The Building Fire Safety Committee determined that the fire safety of the building is not adequate to protect the safety of the occupants should a fire occur in the building.

Where the fire safety of a building is not considered adequate, a Building Fire Safety Committee is empowered under Section 157 of the *Planning, Development and Infrastructure Act 2016* to serve notice on the building owner requiring the owner to undertake actions to improve the fire safety to an adequate level.

The *[insert name of council or regional council area]* Building Fire Safety Committee met on *[insert date]* to consider appropriate action. In this case the Building Fire Safety Committee resolved to serve you with the attached Section 157(3) Notice of Fire Safety Defect.

This notice requires you to report within two months to the Building Fire Safety Committee on the work or other measures necessary to ensure that the fire safety of the building is made adequate. During that period, you may make representation(s) to the Building Fire Safety Committee about the fire safety of the building and the work or other measures to be carried out.

If you dispute any of the details of this notice, you have 14 days in which to lodge an appeal with the Registrar of the Environment, Resources and Development Court. For more information contact the Court administration on 8204 0289 or by email at [erdcourt@courts.sa.gov.au](mailto:erdcourt@courts.sa.gov.au)

Yours sincerely

*[Insert name of Chairperson]*

CHAIR  
BUILDING FIRE SAFETY COMMITTEE  
*[Insert name of council or regional council area]*

### 3. Letter associated with issuing a Section 157(7) Notice of Building Work or Other Actions Required

Date

*[Insert name of property owner] [Insert name of property]*

*[Insert postal address for property owner]*

Dear Sir/Madam

*[Insert property name, and property location]* – **Building Fire Safety Notice**

In accordance with the *Planning, Development and Infrastructure Act 2016*, a Section 157(3) Notice of Fire Safety Defect was issued on the above premises on *[insert date]*. The notice required that you report to the Building Fire Safety Committee on work or other measures necessary to ensure that the fire safety of the building is made adequate.

Following an inspection of the above premises on *[insert date]* the *[insert name of council or regional council area]* Building Fire Safety Committee met on *[insert date]* to consider appropriate action. The Building Fire Safety Committee has considered all reports or representations made by you, or on your behalf, in relation to the fire safety of these premises, and has resolved to serve you with the attached Section 157(7) Notice of Building Work or Other Actions Required. This notice requires you to undertake the scheduled building work within the time prescribed, to ensure that the fire safety of the building is made adequate.

If you dispute any of the details of this notice, you have 14 days in which to lodge an appeal with the Registrar of the Environment, Resources and Development Court. For more information contact the Court administration on 8204 0289 or by email at [erdcourt@courts.sa.gov.au](mailto:erdcourt@courts.sa.gov.au).

Yours sincerely

*[Insert name of Chairperson]*

CHAIR

BUILDING FIRE SAFETY COMMITTEE

*[Insert name of council or regional council area]*

## Appendix C – What the BFSC will consider when assessing if the fire safety of a building is adequate.

If an authorised officer or a fire authority has inspected a building and considers the fire safety is not adequate, the BFSC will then need to identify what features of the building make the fire safety inadequate. Section 157 of the PDI Act, sets out the priorities for assessing and upgrading the fire safety risks of an existing building (in order of priority) as-

- Firstly, a reasonable standard of fire safety for the occupiers of a building
- Secondly, the minimal spread of fire and smoke
- Thirdly, an acceptable fire-fighting environment,

in accordance with the fire safety objectives and performance criteria of the Building Code.

The fire safety of an existing building is not considered adequate if-

- (a) Building occupants are not able to evacuate safely during a fire, due to-
  - (i) Blocked or obstructed exits;
  - (ii) Obstructions in exits and paths of travel to exits;
  - (iii) Width of exits and paths of travel to exits are not adequate to cater for the number of occupants;
  - (iv) Fire and/or smoke spreading to exits and evacuation routes through unprotected openings, damage to fire resisting building elements or lack of smoke control features;
  - (vi) Fire hazards or excessive fire loads that could impede evacuation (which may include combustible floor coverings, ceilings, wall linings and wall claddings);
  - (vii) Insufficient exits to cater for the number of occupants;
  - (viii) Excessive travel distances to exits;
  - (ix) Door hardware and/or direction of door swings in exits that are likely to impede safe evacuation;
  - (x) Inadequate lighting is available for occupants to locate and use exits during an emergency;
  - (xi) No first attack fire-fighting facilities available for occupant use; or
  - (xii) Building occupants will not receive adequate warning of a fire or other emergency to enable them to evacuate to a safe place;
- (b) Occupants using exits and paths of travel to exits are not protected from the effects of smoke and fire (e.g. by fire resisting construction, by use of non-combustible materials, by use of materials that have low fire hazard properties, by use of a smoke control system or fire suppression system), and/or
- (c) The fire brigade cannot access or use existing fire services and equipment needed for fire-fighting operations and to assist safe evacuation.

When the fire safety of a building is not adequate, the role of a Building Fire Safety Committee is to work with the building owner to develop a cost effective solution that will make the fire safety of the building adequate.

Ministerial Building Standard MBS 001 – Upgrading health and safety in existing buildings outlines the

general requirements for fire safety in existing buildings. Sections 301 to 331 of that Standard have performance requirements and deemed-to-satisfy provisions for fire safety in existing buildings and Appendix B4 of the Standard expands on the fire safety priorities required by the PDI Act, which are-

## **1. A reasonable standard of fire safety for the occupiers of a building**

A reasonable standard of fire safety can be achieved where occupants are alerted to a fire in the building and are able to find and use exits and evacuation routes to evacuate to a safe place before being overcome by the effects of smoke or fire.

Safe evacuation can be achieved if-

- Occupants, particularly sleeping occupants, are alerted to a fire in the building as soon as possible;
- The number, dimensions, location, operation and visibility of exits and evacuation routes are sufficient to enable the number of occupants to evacuate safely;
- Occupants using exits and evacuation routes to evacuate are protected from the effects of smoke and/or fire during the time needed for safe evacuation; and
- The building will maintain structural stability for the period of time needed for building occupants to evacuate to a safe place before being overcome by smoke or fire.

Occupants can be protected during evacuation through the use of-

- Non-combustible and/or fire or smoke resisting building elements where necessary to-
  - Delay or prevent fire from damaging structural elements in exits and evacuation routes;
  - Prevent smoke and/or fire spreading to exits and evacuation routes;
  - Reduce travel distances and allow occupants more time to reach exits and evacuation routes;
  - Contain or separate special fire hazards from exits and evacuation routes.
- Additional exits to decrease travel times needed to reach an exit;
- Fire extinguishers for occupants to use to undertake initial fire attack;
- Fire hose reels where appropriate and available for occupants to use to undertake initial fire attack;
- Fire hazard reduction strategies (e.g. reducing fire loads that could arise from storage of highly combustible materials or goods);
- Early fire suppression systems such as sprinklers where appropriate to-
  - Delay or prevent fire from damaging structural elements in exits and evacuation routes;
  - Prevent smoke and/or fire spreading to exits and evacuation routes;
  - Permit extended travel distances and still allow occupants time to reach exits and evacuation routes;
  - Suppress a fire arising from an identified fire hazard;
  - A smoke extraction system to keep smoke above a safe level within exits and evacuation routes.

## 2. Minimal spread of fire and smoke

Minimal spread of fire and smoke can be achieved if smoke and fire spread to evacuation routes is minimised to the extent necessary to enable occupants to reach exits and evacuation routes before being overcome by the effects of smoke or fire.

Smoke and fire spread can be minimised through the use of-

- Fire or smoke resistant construction where necessary to-
- Delay or prevent fire from damaging structural elements in evacuation routes;
- Prevent smoke and/or fire spreading to and within evacuation routes, from one fire compartment to another, or from one storey to another storey;
- Allow occupants more time to use evacuation routes to reach exits.
- An early fire suppression sprinkler system where necessary to-
  - Delay or prevent fire from damaging structural elements in evacuation routes;
  - Reduce fire and/or smoke spreading within evacuation routes, from one fire compartment to another fire compartment, or from an identified fire hazard;
  - Allow occupants more time to use evacuation routes to reach exits.
- A smoke extraction system to keep smoke above a safe level within evacuation routes, or from spreading from one fire compartment to another fire compartment.
- Early fire brigade intervention where fire-fighting facilities are available and where the building or occupant characteristics are such that they need to rely on fire brigade intervention for safe evacuation.

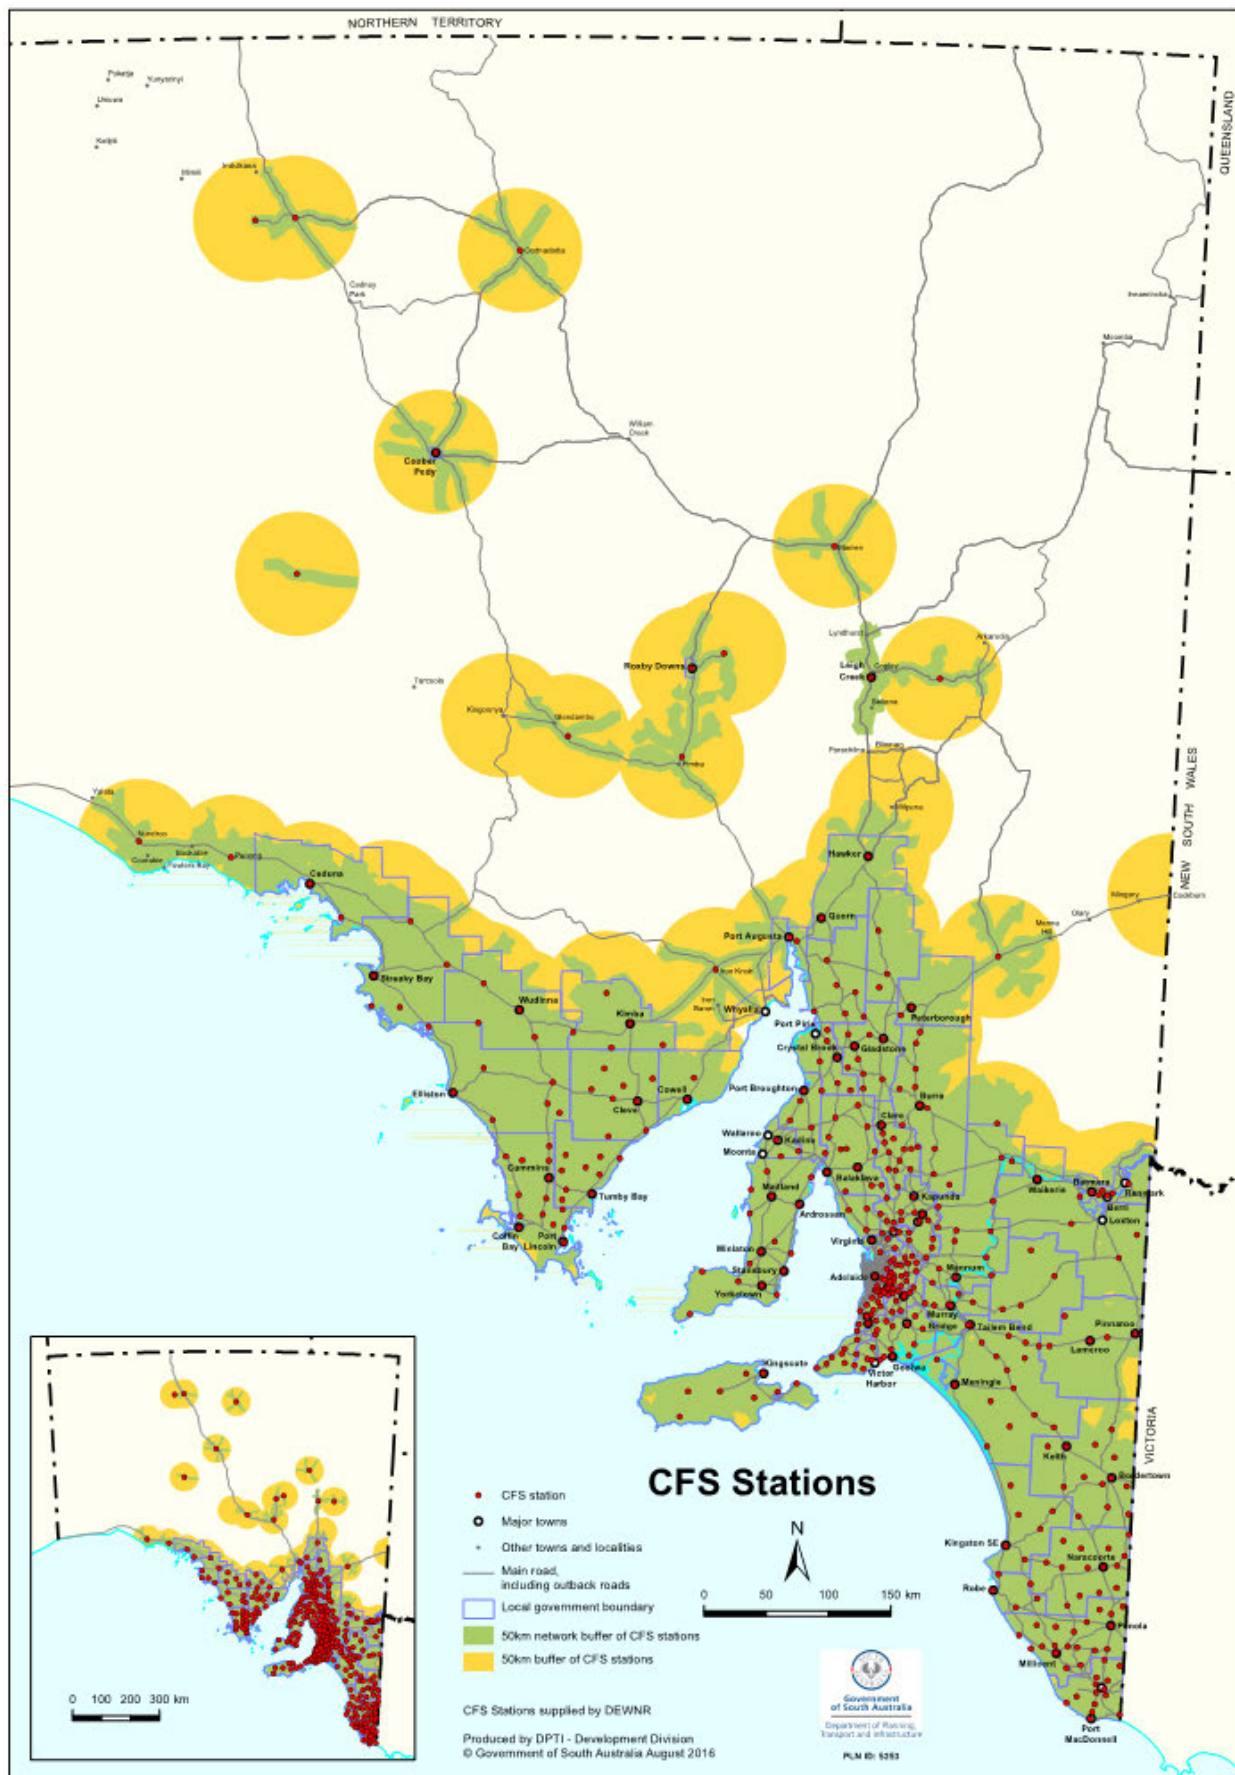

## 3. An acceptable fire-fighting environment

An acceptable fire-fighting environment can be achieved if the fire brigade is able to safely access and use facilities needed for its fire-fighting operations.

Safe access and facilities needed for fire-fighting operations may include-

- Where provided, a fire hydrant system or other water supply system for fire-fighting purposes that is suitable for use by the fire brigade
- Where provided, fire monitoring connections to the fire brigade are working as required
- Where provided, a fire control centre/room is protected from fire/smoke spread and has working equipment suitable for use by the fire brigade for its fire-fighting operations
- The building maintaining structural stability and resisting the spread of fire and smoke to the extent necessary for the fire brigade to safely access and use facilities provided for its fire-fighting operations.

Brett Loughlin  
Chief Officer  
Country Fire Service

By email: [REDACTED]

Dear Mr Loughlin

**Confirming Nomination for Joint Building Fire Safety Committee – State Planning Commission & District Council of Coober Pedy**

The State Planning Commission has now resolved to establish a Joint Building Fire Safety Committee (BFSC) to comply with the requirements of s 157 of the *Planning, Development and Infrastructure Act 2016 (Act)*, and has designated the BFSC as the appropriate authority in relation to the combined areas of the District Council of Coober Pedy and the Out of Council areas in South Australia (exercising the power provided by regulation 92 of the *Planning, Development and Infrastructure (General) Regulations 2017* in relation to the Out of Council areas).

The Act requires that membership of the BFSC includes a representative from the SA Country Fire Service (CFS), given their responsibility for incidents in these areas. The Commission writes to confirm that Mr Colin Paton has been appointed as a member of the new BFSC (replacing his previous appointment to the committee which previously existed for the out of council region alone).

If you have any queries, please do not hesitate to contact Jodie Evans on [REDACTED] or via email at [REDACTED]

Yours sincerely

Dear Ms Evans

**Confirming Membership of Joint Building Fire Safety Committee – State Planning Commission & District Council of Coober Pedy**

The State Planning Commission (Commission) has resolved to establish a Joint Building Fire Safety Committee (BFSC) to comply with the requirements of s 157 of the *Planning, Development and Infrastructure Act 2016* (Act). The Commission has designated the BFSC as the appropriate authority in relation to the combined areas of the District Council of Coober Pedy and the Out of Council areas in South Australia (exercising the power provided by regulation 92 of the *Planning, Development and Infrastructure (General) Regulations 2017* in relation to the Out of Council areas), whilst simultaneously resolving to dissolve the committee which previously existed for the Out of Council region alone.

I confirm that the Commission has appointed you as a member of this new BFSC for a period of three years, commencing 5 December 2024 and expiring 4 December 2027, under the provisions of the Act. I have enclosed a copy of the 'Terms of Reference and Operating Procedures' for the BFSC for your information, and encourage you to familiarise yourself with the obligations under the Code of Ethics for the South Australian public sector, which can be accessed via the following link: <https://www.publicsector.sa.gov.au/hr-and-policy-support/code-of-ethics>.

In accordance with the Department of the Premier and Cabinet Circular: PC016 – Remuneration for Government Appointed Part-Time Boards and Committees (September 2016), as an employee of the State Government, I confirm that you will not be remunerated for your participation on the BFSC.

Yours sincerely

Mr Patrick Conlon  
Principal Administrator  
District Council of Coober Pedy

By email: [REDACTED]

Dear Mr Conlon

**Establishment of Joint Building Fire Safety Committee – State Planning Commission & District Council of Coober Pedy**

The State Planning Commission has now resolved to establish the Joint Building Fire Safety Committee (BFSC) to comply with the requirements of s 157 of the *Planning, Development and Infrastructure Act 2016 (Act)*.

The Commission has designated the BFSC as the appropriate authority in relation to the combined areas of the District Council of Coober Pedy and the Out of Council areas in South Australia, exercising the power provided by regulation 92 of the *Planning, Development and Infrastructure (General) Regulations 2017* in relation to the Out of Council areas. The membership of the BFSC has been established as per the enclosed Agenda Report of the Commission, and the document titled '*State Planning Commission & District Council of Coober Pedy – Joint Building Fire Safety Committee: Terms of Reference and Operating Procedures*'.

To finalise this process, the Council will now need to designate the BFSC as an *appropriate authority* pursuant to the Act and appoint the identified members of the BFSC in the nominated roles. I understand the Department for Housing and Urban Development will also work with the Council to finalise a Memorandum of Understanding in relation to the operation of the BFSC.

If there are any queries, please do not hesitate to contact Jodie Evans on [REDACTED] or via email at [REDACTED].

Yours sincerely
